

AED standing orders “quick card”

If the Subject is 15 years of age or older, and;

- Has confirmed circulatory arrest, (unconscious, unresponsive and not breathing)
- From non-traumatic causes

Then decide which of the two protocols to follow, (witnessed collapse **OR** unwitnessed collapse)

Witnessed Collapse

If you witnessed the subject collapse and the AED is immediately available (within 2 minutes) **then** turn on the AED and follow the prompts.

Unwitnessed Collapse

If you did not witness the collapse, then begin giving chest compressions at a rate of 100 per minute for 2 minutes, (200 compressions).

After completing 200 chest compressions, turn on the AED and follow the prompts.
